COMMENTS:

On 12/17/2025 a Form 17 was completed with a beginning pressure of 53 psi and an ending pressure of 0 psi. Gas was present at the start of the test but were not continuous. Due to the initial high pressure, we would like to add this well to our mitigation program. We would like to open the bradenhead to the existing abatement system, which does not vent gas to keep pressure below 50 psi threshold. We will monitor pressures and at the end of the 6 months, we will perform an additional Form 17 and a Form 4 follow-up will be submitted.
