Closure Information

This final reclamation completion notice is intended to close the MCCLELLAN-64N65W/4SWNE (306445) location which consists of the MCCLELLAN #4-15 (API # 05-123-24665) wellhead. This wellhead does not share a disturbance with any other wells or tank batteries. There is one off-location flowline associated with this well that transported crude oil to the associated tank battery, and was removed in March of 2020. The associated tank battery has its own location ID (426074) which will remain open until final reclamation has been achieved.

MCCLELLAN #4-15 was reclaimed and returned to the landowner for agricultural use in 2020. The wellhead was accessed from an unpaved access road that originated at the existing tank battery. The tank battery was accessed off of County Road 50. The access road was reclaimed and returned to agriculture in conjunction with the reclamation of the well location.

Two corrective actions (CA's) were identified during the records review. These CA's came from an inspection on 1/11/2019 by Tom Peterson stating, "Outdated emergency contact number. Master valve and fittings on ground at wellhead." All of the CA's mentioned above were addressed during the following inspection on 2/25/2019 conducted by Tom Peterson.

No Remediation Workplans (Form 27-I) nor Spill/Releases (Form 19) were identified during the records review.

Drone imagery confirms that no equipment was left on site at this location after reclamation activities occurred.
