Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____

Volume of liquid waste (barrels) _____

Is further site investigation required?

A supplemental site investigation (SSI) will be completed to collect background samples (5+). The background samples will be analyzed for metals and inorganics in soil per ECMC Table 915-1 to determine if the arsenic, barium, and lead exceedances observed during the remedial excavation are attributed to native soil conditions at the site. Background samples will be collected per the soil sample location map attached to the approved Form 27 (Doc. #404178155).

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The 1,2,4-trimethylbenzene, naphthalene, total petroleum hydrocarbons, 1-methylnaphthalene, and 2-methylnaphthalene exceedances observed at sample locations FS01@6', FS01@7-8', SS01, and SS08 were removed through remedial excavations on 01/10/2025 and 01/14/2025. Approximately 41 cubic yards of impacted material was removed and transported to the Tower Landfill for disposal under Noble waste manifests.

REMEDIAL ACTION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

An SSI will be completed to collect background samples (5+). The background samples will be analyzed for metals and inorganics in soil per ECMC Table 915-1 to determine if the arsenic, barium, and lead exceedances observed during the remedial excavation are attributed to native soil conditions at the site. Background samples will be collected per the soil sample location map attached to the approved Form 27 (Doc. #404178155).

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Groundwater was not encountered during the initial decommissioning or remedial excavation activities.

REMOVED

Do all soils meet Table 915-1 standards? No

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? Yes

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? Yes

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

REMEDIAL ACTION DATES

Proposed start date of Remediation. 03/31/2026

Proposed date of completion of Remediation. 09/30/2026

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

The implementation schedule has been modified to reflect the completion of remedial excavation activities at the Orr State 40-36 Pad partially buried vault (PBV), as well as the necessity for additional SSI activities adjacent to the tank battery. The proposed site investigation is tentatively scheduled for completion by the end of 1Q 2026.

OPERATOR COMMENT

This Form 27 is being submitted to provide a 1Q 2026 update for the Orr State 40-36 Pad PBV (REM #38155). No work has been completed since the previous quarterly update.

In response to ECMC Form 27 Comment dated 12/10/2025 (Doc. #404390485), active negotiations with landowner are in progress regarding access terms and timing to complete the site investigation. The site investigation is of the Operator's highest priority and will be completed in accordance with approved work plans and the 900 series rules.

An SSI will be completed to collect background samples (5+). The background samples will be analyzed for metals and inorganics in soil per ECMC Table 915-1 to determine if the arsenic, barium, and lead exceedances observed during the remedial excavation are attributed to native soil conditions at the site. Background samples will be collected per the soil sample location map attached to the approved Form 27 (Doc. #404178155).

Pursuant to Rule 913.e., quarterly reporting will be conducted until closure criteria are achieved for the remediation project. The results of the site investigation will be submitted on a subsequent Form 27.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
