Operator Comment: QB weed treatment records show that Russian knapweed and Russian thistle were treated 9/3/2025. Treatment was completed with an herbicide blend that desiccates the seeds to reduce the next season's germination and is absorbed through the plant system to mitigate perennial weeds, such as knapweeds, preventing them from returning the next growing season. The site will be inspected in the spring and summer of 2026 and any new weeds will be treated as-needed.
