Comments:

The former HAUCK 24-29 well (API: 05-123-26723) was P&A'd on October 12, 2021, as identified in Form 6, Document Number 402855365. On December 22, 2025, Ensolum conducted a final reclamation inspection for the HAUCK 24-29 well pad and it was determined that the site is compliant with final reclamation requirements per ECMC Rule 1004.

During the inspection, it was observed that the former HAUCK 24-29 well is located within a landscaped area at the Xanadu Alpaca Farm that includes established trees, mulch, and sod. The associated reclaimed tank battery is located 0.29 miles northeast of the P&A'd well site and final reclamation documentation for the former tank battery will be submitted concurrently with the Final Reclamation Completion Notice for the associated P&A'd Kerr-McGee producing well: API: 05-123-26722. Ensolum personnel located the P&A'd wellhead location using a handheld Trimble DA2 Global Positioning System (GPS) unit and latitude, and longitude coordinates obtained from the ECMC online database. A general Site Location Topographic Map is included as Figure 1; and the Site Map displaying the location of the reclaimed site on aerial imagery is included as Figure 2. Photographs of the P&A location were taken facing each cardinal direction from the P&A wellhead location. The photographic log is included as Attachment 1.

According to ECMC Document No. 2016597, the former HAUCK 24-29 well site is classified as agricultural field land use. Based on current site conditions, the land use has since changed and is now part of a landscaped area within an alpaca farm. A Form 4 Sundry Notice requesting final reclamation status has been prepared noting this land use change for the submittal to the ECMC. This letter will be included as an attachment to the electronic Form 4 submittal.
