Eric,

We are currently rigged up on the State 13-22 (05-005-06740) re-entry and have slowed down considerably over the last 24 hours. For most of the well we were averaging over 100 ft/hr ROP but we are now below 20. We previously tripped for a new bit and motor. We are currently at 6,282'.

With your approval I'd like to plug out from here. We will pump a 250' plug from here – 6,030' then proceed out as per the Form 6.

Thanks,

**Trey Sloan**
