General Comment:

On March 27th, 2026 Reclamation Specialist Corey McDonough conducted a Final Reclamation Inspection at Logos Operating's Bondad 33-10 6 location in La Plata County, Colorado.

This is a follow up inspection to inspection doc # 714001377.

Additionally, this inspection is also in response to resolution doc #404004715 stating corrective actions' have been completed. It was observed in this inspection that the previously observed corrective actions' regarding weedy debris dominating project area have been addressed. However, issues regarding stormwater issues at the access road remaining outstanding.

During the inspection the following compliance issues were observed.

- Stormwater
- Noxious Weeds/Final Reclamation Vegetation

Any Corrective Actions from previous inspections that have not been addressed are still applicable.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Refer to transect data attached to this report.

 VEGETATIVE COVER FAIL

Comment:

	<p>It was noted that weedy debris (including Kochia and Russian thistle) that were previously observed has been removed from the project area however, location is now dominated by a Colorado List C noxious weed Redstem filaree (<i>Erodium cicutarium</i>) as well as non native Blue mustard (<i>Chorispora tenella</i>). These two species make up 54% of the vegetation "hits" on the location. Refer to vegetation transect data sheet attached to the end of this report.</p> <p>Bare soils remain at portions of the access road where active erosion and sediment transport are occurring.</p>	
Corrective Action:	<p>Comply with Rule 1004. Reseed access road using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p> <p>Treat noxious weeds at location to promote establishment of desirable vegetation at the reclaimed well pad.</p>	Date _____
Overall Final Reclamation Fail Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>		

Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: Erosion persists at location access road.

Corrective Action: Comply with rule 1002f.

Stormwater and erosion controls are needed on bare soils of the access road until the location is stabilized with long term desirable vegetation.

Date: _____

Pits: NO SURFACE INDICATION OF PIT
