Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECMC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR INFORMATION

Name of Operator: KERR MCGEE OIL & GAS ONSHORE LP	Operator No: 47120	Phone Numbers
Address: P O BOX 173779		Phone: (720) 929-4307

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	GROUNDWATER	TBD	Groundwater Samples/Laboratory Analytical Results
Yes	SOILS	TBD	Soil Samples/Laboratory Analytical Results

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Decommissioning activities were completed at the LDS 16-24, Presiding O SA Facility on January 2 and January 4, 2024. Visual inspection and field screening of soil at four aboveground storage tanks (ASTs), one produced water vessel (PWV), three separators, one emission control device (ECD), four dumptine potholes, and one meter house location were conducted following removal activities. Soil samples (AST01@0.5', AST02@0.5', AST03@0.5', AST04@0.5', PWV-B01@4', PWV-N01@2', SEP01-INLET@4', SEP01-OUTLET@3', SEP02-INLET@4', SEP02-OUTLET@3', SEP03-INLET@4', & SEP03-OUTLET@3') were submitted for analysis of full list Table 915-1 constituents, to determine if a release occurred. Laboratory analytical results indicated that benzo(a)anthracene, 1-methylnaphthalene, sodium adsorption ratio (SAR), pH, boron, arsenic, barium, cadmium, and/or hexavalent chromium impacts exceeding the ECMC Table 915-1 allowable levels or background levels were present at the ASTs, PWV, SEP01 and SEP02 locations. As such, Form 19 Initial/Supplemental Spill/Release Report (Document # 403646804) was submitted on January 8, 2024, and the ECMC issued Spill/Release Point ID 485907. Verification samples were collected to confirm the initial results at AST03, SEP01-OUTLET, SEP03-OUTLET, PWV-B01, and PWV-N01. Results for the verification samples were within the Table 915-1 allowable levels or background levels except for AST03 and SEP01-OUTLET. Per updated ECMC guidance, verification sampling or laboratory re-runs of organic exceedances are not considered valid and additional excavation will be conducted at the SEP03-OUTLET@3' location.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Between January 2 and May 31, 2024, excavation activities were conducted to address remaining soil impacts at the former tank battery and separator locations. Confirmation soil samples were collected from the base and sidewalls of the excavations at depths ranging from 2.5 to 11 ft bgs. The confirmation soil samples were submitted for laboratory analysis of the site-specific waste profile including total petroleum hydrocarbons (TPH), benzene, toluene, ethylbenzene, xylenes (BTEX), trimethylbenzenes (TMBs), naphthalene, polycyclic aromatic hydrocarbons (PAHs), SAR, boron, and/or select Table 915-1 metals, using ECMC-approved methods. Laboratory analytical results indicate pH, cadmium, and selenium impacts above the ECMC Table 915-1 allowable level and site-specific background level remain in the excavations.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

On February 29, 2024, one groundwater sample was collected from the separator excavation (GW01). The sample was submitted for laboratory analysis of full list Table 915-1 constituents in groundwater. Based on the laboratory analytical results, groundwater concentrations were in full compliance with ECMC Table 915-1 allowable levels for Table 915-1 organic constituents, chloride, and sulfate. One background groundwater sample (GW-NATIVE-BG01@8') was collected and submitted for analysis of Table 915-1 inorganic constituents in groundwater. Laboratory analytical results indicate that groundwater is in compliance with Table 915-1 allowable levels or background levels. Due to groundwater in contact with impacted soil and compliant organic detections, monitoring wells will be installed.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

On January 5, 2024, visual inspections and field screening of soils were conducted at the hatch and loadout for all the ASTs, three sidewalls of the PWV excavation, four pothole dumptine locations, the ECD, and the meter house. Based on the inspection and screening results, hydrocarbon-impacted soils were not observed at the soil screening locations. As a result, no soil samples were submitted for laboratory analysis from these areas in accordance with the ECMC Operator Guidance for Oil & Gas Facility Closure document.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 64

Number of soil samples exceeding 915-1 62

Was the areal and vertical extent of soil contamination delineated? No

Approximate areal extent (square feet) 13390

NA / ND

-- Highest concentration of TPH (mg/kg) 826

-- Highest concentration of SAR 25.7

BTEX > 915-1 No

Vertical Extent > 915-1 (in feet) 11

Groundwater

Number of groundwater samples collected 1

Was extent of groundwater contaminated delineated? No

Depth to groundwater (below ground surface, in feet) 11

Number of groundwater monitoring wells installed 0

Number of groundwater samples exceeding 915-1 0

ND Highest concentration of Benzene (µg/l) _____

ND Highest concentration of Toluene (µg/l) _____

ND Highest concentration of Ethylbenzene (µg/l) _____

ND Highest concentration of Xylene (µg/l) _____

NA Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected

 Number of surface water samples exceeding 915-1

If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

One background soil sample was collected from the soil used to construct the tank battery but is no longer being applied due to excavation. Thirty-six native background soil samples were collected from native material outside of the facility excavations. Fifty background samples were collected as part of the Presiding Bish Un 1, LDS 16, 39-24, and LDS 15-24 wellheads cut and cap activities (Rem Nos. 31778, 31702, 31784), located 1,000 to 2,000 ft southeast, from similar depths (3-6 ft bgs) and the same NRCS soil type (Wiley-Colby Complex). Background samples were submitted for analysis of pH, EC, SAR, boron, and/or select Table 915-1 metals.

One background groundwater sample (GW-NATIVE-BG01@8) was collected.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____

Volume of liquid waste (barrels) _____

Is further site investigation required?

Due to groundwater in contact with impacted soil and compliant organic detections, monitoring wells will be installed to verify that no dissolved-phase impacts are present. The monitoring well installation scope of work will be submitted in a subsequent Form 27 Supplemental report following completion of soil assessment activities.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Impacted soil will be removed and transported to a licensed disposal facility. Final disposal information will be provided upon completion of excavation activities. Disposal records will be kept on file and available upon request. The excavation areas will be backfilled and contoured to match pre-existing conditions.

REMEDICATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Laboratory analytical results indicate 1-methylnaphthalene, pH, cadmium, and selenium impacts above the ECMC Table 915-1 allowable level and site-specific background levels remain in at SEP03-OUTLET@3' and in the AST, PWV, and SEP01 excavations. Groundwater was encountered in the separator excavation at approximately 11 ft bgs. Analytical results indicate that groundwater is in compliance with Table 915-1 allowable levels or background levels. Due to groundwater in contact with impacted soil and compliant organic detections, monitoring wells will be installed to verify that no dissolved-phase impacts are present. The monitoring well installation scope of work will be submitted in a subsequent Form 27 Supplemental report following completion of soil assessment activities. Excavation activities are on hold.

Soil Remediation Summary

In Situ

Ex Situ

- _____ Bioremediation (or enhanced bioremediation)
- _____ Chemical oxidation
- _____ Air sparge / Soil vapor extraction
- _____ Natural Attenuation
- _____ Other _____

- _____ Excavate and offsite disposal
- _____ If Yes: Estimated Volume (Cubic Yards) _____
- _____ Name of Licensed Disposal Facility or ECMC Facility ID # _____
- _____ Excavate and onsite remediation
- _____ Land Treatment
- _____ Bioremediation (or enhanced bioremediation)
- _____ Chemical oxidation
- _____ Other _____

Groundwater Remediation Summary

- _____ Bioremediation (or enhanced bioremediation)
- _____ Chemical oxidation
- _____ Air sparge / Soil vapor extraction
- _____ Natural Attenuation
- _____ Other _____

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

Due to groundwater in contact with impacted soil and compliant organic detections, monitoring wells will be installed to verify that no dissolved-phase impacts are present. The monitoring well installation scope of work will be submitted in a subsequent Form 27 Supplemental report following completion of soil assessment activities.

REMEDIATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other _____

Request Alternative Reporting Schedule:

Semi-Annually Annually Other _____

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report
 Other _____

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).

If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

KMOG has sufficient insurance and bonding to fully address the anticipated costs of Remediation, including the remaining estimated costs for this project. KMOG currently has over 40 million in bonds with the Energy and Carbon Management Commission. The cost for remediation is a preliminary estimate only, costs may change upwards or downward based on site-specific information. KMOG makes no representation or guarantees as to the accuracy of the preliminary estimate.

Operator anticipates the remaining cost for this project to be: \$ 20500 _____

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? _____

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards _____

E&P waste (solid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

Volume of E&P Waste (liquid) in barrels _____

E&P waste (liquid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

REMEDIATION COMPLETION REPORT

REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No _____

If YES:

- Compliant with Rule 913.h.(1).
- Compliant with Rule 913.h.(2).
- Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? _____

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeded program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The site will be reclaimed in accordance with ECMC 1000 Series Reclamation Rules.

Is the described reclamation complete? _____

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim

Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. _____

Proposed date of completion of Reclamation. _____

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 01/15/2025

Actual Spill or Release date, or date of discovery. 01/08/2024

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 01/02/2024

Proposed site investigation commencement. 01/02/2024

Proposed completion of site investigation. 08/13/2026

REMEDIAL ACTION DATES

Proposed start date of Remediation. 01/02/2024

Proposed date of completion of Remediation. 08/13/2027

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

OPERATOR COMMENT

KMOG has a large number of active remediation projects and is working diligently to bring each project to closure. These projects are prioritized based on potential environmental risk; considering factors such as size of impact, type of impact, what media is impacted, proximity to sensitive receptors and land use. Due to this prioritization, no field work has been completed on this project since the previous Form 27 submittal.

No additional work has been done since the previous Form 27 submitted on 11/18/2025 (Document No. 404430540). Excavation activities are on hold. The implementation schedule has been updated. Work is anticipated to resume by August 1, 2026.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
