RE: Cinnamon Creek Oil & Gas, Inc. Warning Letter (Document No. 404559883) Response

Ms. Greager,

Per Rule 419, Cinnamon Creek Oil & Gas, Inc. ("Cinnamon Creek") (Operator No.17210) is unable to perform Bradenhead Monitoring, Testing, Mitigation and Reporting.

Bradenhead tests cannot be performed due to surface strings being welded to the conductor pipe; the surface casing is cemented to surface, and the production casing is either welded or clamped to the surface casing. There are no valves available to allow installation of Bradenhead monitoring fixtures.

A Variance From Rule 419 (Docket No. 240500124) was filed May 24, 2024, requesting relief from Bradenhead Monitoring, Testing, Mitigation and Reporting for the following wells:

Location Name	API	Status	Status Date	Location ID	Facility ID	Location	MD (ft)
Alger #1	05-043-40029	SI	12/1/2023	322269	210092	NWSE 3 19S70W	1900
