Also, please note the fish in the hole on the WBD.

Thanks Eric

Eric,

We ended up backing off at 7,155' and pumping our cement plug right on top of that.

Thanks,

Trey

Trey

I am good with that.

Eric

Eric,

Sorry to bug you late but while re-entering the Mother Goose 1 (05-005-06375) we got our bottom plug pumped from 7,760' – 7,500' then got stuck while pulling out of the hole. End of drill pipe is at 7,290'. Based on the timing and depth we think the hole fell back in on us. We are currently working on free pointing to see exactly where we are stuck but by the time we get it all worked out it'll probably be the middle of the night.

If we are able to back off somewhere down near 7,290' are you good with us leaving the fish in the hole and pumping a 100' cement plug on top? I'll give you exact depths in the morning. If we are stuck higher up we won't back off until discussing with you in the morning first.

Thanks,

Trey Sloan
