	Purpose: Decommissioning of Oil and Gas Facilities
	Notes: This Form 27 serves as notification for the abandonment of the Gatewood 11-1 wellhead and removal of the associated flowline. Abandonment activities are planned to begin the week of September 20, 2021. This schedule may be adjusted due to unforeseen circumstances, delays, and/or changes in weather.
	Form 27 Supplemental Docs # & Date: 402904372 - 01/06/2022
	Purpose: : Decommissioning of Oil and Gas Facilities
	Operator Comments: Analytical results indicated that constituent concentrations in sample WH01 @ 8' were in compliance with COGCC Table 915-1 standards, with exception to the pH value. Based on the absence of other indicators that a spill or release occurred, such as hydrocarbon detections or elevated EC and SAR in soil, the pH result at this location is not associated with E&P activities. As such, PDC requests that pH not be considered a Table 915-1 contaminant of concern at this location and is requesting a No Further Action (NFA) determination for the Gatewood 11-1 Wellhead.
	ECMC Comments: N/A
	ECMC COAs: Based on the information presented, it appears that no further remedial action is necessary at this time and the COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if groundwater is found to be impacted, then further investigation and/or remediation activities may be required. This no further action determination is limited to environmental remediation. Operator is required to comply with COGCC 1100 Series Rules for Flowline Regulations for all Flowline Abandonment activities and COGCC 400 Series Rules for Wellhead Plugging and Abandonment. The surface area disturbed by the remediation activity shall be reclaimed in accordance with the 1000 Series Reclamation Rules. For locations with active ongoing oil and gas operations, comply with Rule 1003 interim reclamation requirements and for locations that will no longer have active oil and gas operations, comply with Rule 1004 Final Reclamation requirements.
	Closure Request Approved: Candice (Nikki) Graber
Final Resolution: 1/25/2022

Closure Information

This final reclamation completion notice is intended to close the GATEWOOD-65N65W/1NESW (323734) location which consists of the GATEWOOD #11-1 (API # 05-123-13437) wellhead. This wellhead does not share a disturbance with any other wells or tank batteries. There is one off location flowline associated with this well that transported crude oil to the associated tank battery, and was removed in November of 2021. The associated tank battery has its own location ID (472121) which will remain open until final reclamation has been achieved.

GATEWOOD #11-1 was reclaimed and returned to the landowner for agricultural use in 2021. The wellhead was accessed from an unpaved access road that originated at County Road 60.5. The access road was reclaimed and returned to agriculture in conjunction with the reclamation of the well location.

A Remediation Workplan (Form 27-I) was documented on 08/29/2021 for Decommissioning of Oil and Gas Facilities. On 01/06/2022 a Form 27-S (Doc. #402904372) was filed. This remediation workplan was closed by Candice (Nikki) Graber on 1/25/2022.

No Corrective actions (CA's) nor Spills/Releases (Form 19) were identified during the records review.

Drone imagery confirms that no equipment was left on site at this location after reclamation activities occurred.
