Since these are wells plugged by a previous Operator no longer registered with ECMC, we don't typically process a Form 27 Initial for the re-entry and re-plugging due to the horizontal offset policy. Per that policy, the Operator performing the re-entry will notify ECMC if historical impacts are discovered, and will be responsible for any Spills of E&P Waste that occur as a result of their re-plugging operations.

I am returning these two forms to draft. You may delete them.
