## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	To be tested	Soil Samples

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

In accordance with ECMC Rule 911, this form serves as notification for the decommissioning of the Jagee 1 wellhead and associated production equipment. The ground and sub-surfaces will be visually inspected for hydrocarbon impacts during equipment decommissioning. Field observations and photo documentation will be recorded in a field inspection form for submittal to the ECMC.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples will be collected in the cardinal directions of the wellhead at approximately 4 ft-bgs, and the floor at approximately 6 to 8 ft-bgs for field-screening purposes. One grab soil sample will be collected for laboratory analysis from the highest field-screening result, or from adjacent to flowline riser. One discrete soil sample will be collected for laboratory analysis adjacent to the wellhead. Soil samples will be collected below and/or adjacent to applicable facility equipment, as defined in the Rule 911.a.(4) guidance. Discrete grab confirmation soil samples will be collected for laboratory analysis either in any area of observed hydrocarbon impacts, or in the sample locations designated by aforementioned guidance. At a minimum, Operator will submit one sample per AST and per heater-treater for laboratory analysis. Analytical soil samples will be submitted to an accredited laboratory for analysis of Table 915-1 constituents in soils.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during decommissioning and/or abandonment activities, a grab sample will be collected as soon as practical. If contaminated soil is in contact with groundwater or if free product/hydrocarbon sheen are observed, the release will be reported in accordance with Rule 912.b. Groundwater samples will be submitted for laboratory analysis of Table 915-1 Groundwater Inorganic Parameters and Organic Compounds in Groundwater.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
