Environmental

Spill/Remediation:

Comment:

This is an Environmental Inspection for Remediation Project # 37633. At the time of inspection, open excavations located at the former tank battery located on the western edge of the well location have been backfilled. The contaminated spoil pile observed within the lined containment on location has been recently disturbed with a reduction in the amount of soil staged within the lined contaminated. Operator shall provide Waste Manifests for the removal of contaminated soils from remediation project # 37633.

In addition, the Operator shall provide all recent and historical analytical data for the delineation of impacted soils associated with Remediation Project # 37633.

The last quarterly update for Remediation Project # 37633 was received on 08/27/2025, Form 27-S document no. 404331965. The quarterly update (90-day) was due on November 25, 2025. Operator shall submit a Supplemental Form 27-S, for Remediation Project # 37633 and update the implementation schedule in accordance with Rule 913.

In addition, Operator will provide an explanation for late reporting on the next Form 27 Supplemental including actions implemented to prevent late reporting in the future.

In accordance with Rule 913.e., Operator will adopt a quarterly reporting schedule (every 90 days). Operator shall provide a current map of the subject location including current excavation limits and/or sample locations, proposed/actual soil boring locations and monitoring well locations. GPS data used to create the map must comply with ECMC Rule 216.

Corrective Action:

The Original Corrective Action Date of 1/29/2026 shall apply.

Date: 01/29/2026
