FIELD INSPECTION FORM

Loc ID _____ Inspector Name: _____ On-Site Inspection
Rollins, Grace _____ 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

ECMC Operator Number: 46290
Name of Operator: KP KAUFFMAN COMPANY INC
Address: 1700 LINCOLN ST STE 4550
City: DENVER State: CO Zip: 80203

Findings:

- 12 Number of Comments
- 5 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

General Comment:

ECMC Field Inspection Report Summary

Any corrective actions from previous inspections, NOAVs and/or conditions of approval from previous forms that have not been fully addressed are still applicable. There were no operator or contract environmental personnel on location at the time of this inspection. Photos attached to document site conditions.

Spill/Release Point ID 482194 is located nearby and will be addressed in a separate Field Inspection Report, Document # 717100507.

Spill Name: Stromquist 4A - 9/11/25

Spill ID: 491349

Date of Initial Discovery: 09/09/2025

Date of Discovery (by Operator): 09/11/2025

Date of Inspection: 03/25/2026

Weather: Sunny, 86°F

The spill is located within or in close proximity to:

-Within the Town of Frederick

-Idaho Creek (<100 ft)

-Riverine wetland (<100 ft)

-NWI mapped Freshwater Pond (~200 ft)

-Within buffers for the following CPW High Priority Habitats: Bald Eagle Active Nest Site Half Mile & Bald Eagle Roost Site

-Within a FEMA 100-Year Effective (2020) Floodplain

-Residential Building Units (~200 ft)

Current site status:

-Three excavations remain open on location. Groundwater with free product was observed at the base of excavations at the spill location; groundwater with a sheen was observed at the base of an excavation immediately east of the spill location. Petroleum hydrocarbon saturated soil, stained soil, and salt crusting were visible on the sidewalls of excavations. A petroleum hydrocarbon odor was observed throughout the location.

-Bird netting has been installed over the excavations.

-The soil stockpile marked "contaminated" documented by multiple previous FIRs remains on location. Impacted soil was observed within the stockpile. A liner is visible but has been compromised by holes/tears; soil has spilled outside of containment. Additional unmarked, unlined soil stockpiles with no stormwater BMPs were observed on location. Areas of gray staining are visible within one of the unmarked soil stockpiles, as documented by previous FIR Document # 717100397.

-Orange construction fencing has been installed around the perimeters of the excavations.

-Unused supplies/equipment remain on location.

See attached corrective actions.

Type: Flow Line

#

Comment: The spill does not plot along any mapped flowlines in the area.

Corrective Action: Per the COA on Form 19 Document # 404352364: Pursuant to Rule 1101.b.(3)(C) The GIS data for off-location flowlines must be the most accurate data possible without using invasive methods AND a minimum horizontal positional accuracy of +/- 25 feet. Operator shall provide an updated flowline alignment via Form 44 within 90 days of spill discovery. Operator shall include the Form 44 Document number on the Form 19 — Supplemental Report requesting closure. The Form 19 — Supplemental Report which provides the Document number of the Form 44 with an updated flowline alignment was due by 12/10/2025.

Date: 12/10/2025

Operator shall submit delinquent form(s) for this project. Additional flowline issues are being referred to Flowline Integrity staff.

Field Parameters:

Sample Location: _____ Comment: _____

Waste Management:

Type	Management	Condition	GPS (Lat)	(Long)
Oily Soil	Piles	Inadequate		
Comment	The soil stockpile marked "contaminated" documented by previous FIRs remains on location. Impacted soil was observed within the stockpile. A liner is visible but has been compromised by holes/tears; soil has spilled outside of containment. Additional unmarked, unlined soil stockpiles with no stormwater BMPs were observed on location. Areas of gray staining are visible within one of the unmarked soil stockpiles, as documented by previous FIR Document # 717100397.			
Corrective Action	Per the COAs on Form 19 Document # 404352364 and the CAs on multiple previous FIRs: Due to the sensitive nature of this location (close proximity to residential areas, CPW High Priority Habitats, NWI mapped wetlands, and surface waters), E&P waste storage in stockpiles is not acceptable. CA due date backlisted per the COA applied to Form 19 Document # 404352364.			Date: 09/15/2025
	Operator shall implement, continuously monitor and maintain best management practices to protect the environment, public health, safety and welfare and the environment as required by Rule 913.b.(5)B.i and ECMC Guidance 913.b. (5)B i-v which requires fencing used be appropriate to the site. CA due date backlisted to the date of approval of Form 19 Document # 404352364 (09/15/2025).			

Spill/Remediation:

Comment: Three excavations remain open on location. Groundwater with free product and/or sheen was observed at the bases of excavations. The presence of free product on groundwater has been documented at all excavations by previous FIR Document # 717100397. Petroleum hydrocarbon saturated soil, stained soil, and salt crusting were visible on the sidewalls of excavations. A petroleum hydrocarbon odor was observed throughout the location. Stained soil is visible outside of the spill/release response footprint.

Corrective Action: In accordance with 912.a.(2) Operator will investigate, cleanup, and document impacts resulting from Spill and Releases as soon as the impacts are discovered. Operator shall IMMEDIATELY resume cleanup activities at this location (following consultation with CPW). Date: _____
