Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by ECOM is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

PROJECT, PURPOSE & SITE INFORMATION

PROJECT INFORMATION

Remediation Project #: 31260 Initial Form 27 Document #: 403478121

PURPOSE INFORMATION

- Rule 913.c.(1): Pit or Cuttings Trench closure.
- Rule 913.c.(2): Buried or partially buried vessel closure, which will be by removal.
- Rule 913.c.(3): Remediation of Spill and Releases pursuant to Rule 912.
- Rule 913.c.(4): Land treatment of Oily Waste pursuant to Rule 905.e.
- Rule 913.c.(5): Closure of Centralized E&P Waste Management Facilities pursuant to Rule 907.h.
- Rule 913.c.(6): Remediation of impacted Groundwater pursuant to Rule 915.e.(3).D, and the contaminant concentrations in Table 915-1.
- Rule 913.c.(7): Investigation and remediation of natural gas in soil or Groundwater.
- Rule 913.c.(8): When requested by the Director due to any potential risk to soil, Groundwater, or surface water.
- Rule 913.c.(9): Decommissioning of Oil and Gas Facilities.
- Rule 913.g: Changes of Operator.
- Rule 915.b: Request to leave elevated inorganics in situ.
- Other: _____

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

This project is part of Operator's ongoing data integrity review process associated with its Rule 525.e. Voluntary Disclosure. Operator has completed comprehensive review of previously submitted forms and associated data and attachments of this project. Based on this review, Operator is submitting the attached Data Integrity Review Investigation and Remedial Action Plan (Plan). The Plan includes: 1) an overview of the project's prior remediation measures, including initial actions undertaken; 2) a status update on existing Conditions of Approval (COAs); and 3) proposed next steps.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Operator's proposed soil sampling approach is outlined in the Plan that is being submitted with this Form for approval. Operator will undertake sampling consistent with approval. Key activities will include: 1) Sampling of wellhead soils and analyze for full list of Table 915-1 to confirm the wellhead soil conditions; 2) Conducting delineation sampling at the wellhead to further characterize previously identified soils where Arsenic levels exceeded the Table 915-1 criteria. 3) Screening of flowline every 250 ft and collection of flowline samples, if needed, for analysis of the full suite of Table 915-1 constituents; 4) Collecting additional background samples from appropriate depths to establish site-specific cleanup levels, for comparison with soil sample concentrations for metals and soil suitability, where applicable.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Groundwater was not encountered during the previous investigations. If groundwater is encountered during the site investigation, Operator will develop and submit its proposed groundwater sampling approach for approval. Operator will undertake sampling consistent with approval.

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Surface water was not encountered during previous investigations. If surface water is encountered during the site investigation, Operator will develop and submit its proposed surface water sampling approach for approval. Operator will undertake sampling consistent with approval.

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

As part of our ongoing DIR process, Operator conducted additional reviews of prior data packages/form submissions for all active remediation projects irrespective of whether it was a project site previously included in its Rule 525.e. Voluntary Disclosure; Operator identified potential data discrepancies with this project. Prior to undertaking additional actions associated with any prior approved supplemental F27, Operator submits this supplemental Form 27 to provide: a copy of lab reports identified as containing contractor data alterations (Altered Report); reissuance of the original unaltered copy of the lab report generated by the lab to protect the lab analytical report from subsequent modification by anyone outside the lab (Reissued Report); reissuance of lab report copies submitted at the same time as the Altered Report; and reissuance of copies of all runs/reruns of all analytes. Initial actions were previously undertaken and there are no changes to report at this time.

SITE INVESTIGATION REPORT

SAMPLE SUMMARY

Soil

Number of soil samples collected 2
Number of soil samples exceeding 915-1 2
Was the areal and vertical extent of soil contamination delineated? No
Approximate areal extent (square feet) 100

NA / ND

ND Highest concentration of TPH (mg/kg) _____
-- Highest concentration of SAR 1.13
BTEX > 915-1 No
Vertical Extent > 915-1 (in feet) 8

Groundwater

Number of groundwater samples collected 0
Was extent of groundwater contaminated delineated? No
Depth to groundwater (below ground surface, in feet) _____
Number of groundwater monitoring wells installed _____
Number of groundwater samples exceeding 915-1 _____

Highest concentration of Benzene (µg/l) _____
Highest concentration of Toluene (µg/l) _____
Highest concentration of Ethylbenzene (µg/l) _____
Highest concentration of Xylene (µg/l) _____
Highest concentration of Methane (mg/l) _____

Surface Water

0 Number of surface water samples collected
0 Number of surface water samples exceeding 915-1
If surface water is impacted, other agency notification may be required.

OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Were background samples collected as part of this site investigation?

Background sampling was completed during previous investigations

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____ Volume of liquid waste (barrels) _____

Is further site investigation required?

Noble is proposing to conduct additional site investigation activities as outlined in the attached Data Integrity Review Investigation and Remedial Action Plan. Key activities will include: 1) Sampling of wellhead soils and analyze for full list of Table 915-1 to confirm the wellhead soil conditions; 2) Conducting delineation sampling at the wellhead to further characterize previously identified soils where Arsenic levels exceeded the Table 915-1 criteria. 3) Screening of flowline every 250 ft and collection of flowline samples, if needed, for analysis of the full suite of Table 915-1 constituents; 4) Collecting additional background samples from appropriate depths to establish site-specific cleanup levels, for comparison with soil sample concentrations for metals and soil suitability, where applicable.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? Yes _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Upon completion of assessment/investigation activities, remedial activities will be performed in accordance with the 900 Series Rules.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

This project is part of Operator's ongoing data integrity review process associated with its Rule 525.e. Voluntary Disclosure. Operator has completed a comprehensive review of previously submitted forms and associated data and attachments of this project. Based on this review, Operator is submitting the attached Plan.

Soil Remediation Summary

In Situ

- _____ Bioremediation (or enhanced bioremediation)
- _____ Chemical oxidation
- _____ Air sparge / Soil vapor extraction
- _____ Natural Attenuation
- _____ Other _____

Ex Situ

- _____ Excavate and offsite disposal
- _____ If Yes: Estimated Volume (Cubic Yards) _____
- _____ Name of Licensed Disposal Facility or ECMC Facility ID # _____
- _____ Excavate and onsite remediation
- _____ Land Treatment
- _____ Bioremediation (or enhanced bioremediation)
- _____ Chemical oxidation
- _____ Other _____

Groundwater Remediation Summary

- _____ Bioremediation (or enhanced bioremediation)
- _____ Chemical oxidation
- _____ Air sparge / Soil vapor extraction
- _____ Natural Attenuation
- _____ Other _____

GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

REMEDATION PROGRESS UPDATE

PERIODIC REPORTING

Approved Reporting Schedule:

Quarterly Semi-Annually Annually Other

Request Alternative Reporting Schedule:

Semi-Annually Annually Other

Rule 913.e:

After initial approval of a Form 27, the Operator will provide quarterly update reports in a Supplemental Form 27 to document progress of site investigation and remediation, unless an alternative reporting schedule has been requested by the Operator and approved by the Director. The Director may request a more frequent reporting schedule based on site-specific conditions.

Report Type: Groundwater Monitoring Land Treatment Progress Report O&M Report
 Other Site Data Integrity Review and Remedial Action Plan

Adequacy of Operator's General Liability Insurance and Financial Assurance

Describe the adequacy of the Operator's general liability insurance and Financial Assurance to fully address the anticipated costs of Remediation, including the estimated remaining cost for this project (below).
If this information has been provided on a Form 27 within the last 12 months, provide the Document Number of that form.

Noble intends to directly address the costs of remediation at the locations as part of our asset retirement obligation process and operations. Noble has general liability insurance (policies MWZZ316714 and MWZX316724) and financial assurance in compliance with ECMC rules. Records are available on the ECMC's website. The cost for remediation is an estimate only, costs may change upwards or downward based on site-specific information. Nobles make no representation or guarantees as to the accuracy of the estimate.

Operator anticipates the remaining costs for this project to be determined with the development of work plans necessary to meet ECMC regulations.

Operator anticipates the remaining cost for this project to be: \$ 0

WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? No

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Volume of E&P Waste (solid) in cubic yards _____

E&P waste (solid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

Volume of E&P Waste (liquid) in barrels _____

E&P waste (liquid) description _____

ECMC Disposal Facility ID #, if applicable: _____

Non-ECMC Disposal Facility: _____

REMEDATION COMPLETION REPORT

REMEDATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? No

If YES:

- Compliant with Rule 913.h.(1).
- Compliant with Rule 913.h.(2).
- Compliant with Rule 913.h.(3).

Do all soils meet Table 915-1 standards? No

Does the previous reply indicate consideration of background concentrations? _____

Does Groundwater meet Table 915-1 standards? _____

Is additional groundwater monitoring to be conducted? _____

Operator shall comply with the ECMC 1000-Series Reclamation Requirements for all impacted and disturbed areas.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

Reclamation will be in accordance with ECMC 1000 Series Rules.

Is the described reclamation complete? No

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim Final

Did the Surface Owner provide the seed mix? _____

If YES, does the seed mix comply with local soil conservation district recommendations? _____

Did the local soil conservation district provide the seed mix? _____

SITE RECLAMATION DATES

Proposed date of commencement of Reclamation. 02/28/2027

Proposed date of completion of Reclamation. 12/31/2029

IMPLEMENTATION SCHEDULE

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

PRIOR DATES

Date of Surface Owner notification/consultation, if required. 10/26/2023

Actual Spill or Release date, or date of discovery. 03/13/2024

SITE INVESTIGATION DATES

Date of Initial Actions described in Site Investigation Plan (start date). 02/26/2024

Proposed site investigation commencement. 12/01/2023

Proposed completion of site investigation. 02/15/2026

REMEDIAL ACTION DATES

Proposed start date of Remediation. 02/20/2026

Proposed date of completion of Remediation. 02/15/2027

Per Rule 913.d.(2): Any change from the approved implementation schedule will be requested at least 14 days in advance, and the Operator may not make the change without the Director's approval.

Change from approved implementation schedule per Rule 913.d.(2).

Basis for change in implementation schedule:

Completion dates subject to change based upon consent to access property where project is located, data received as part of the site investigation, and implementation of appropriate remedial activities. Initiation of the site investigation project is a result of Operator's ongoing data integrity review process associated with its Rule 525.e. Voluntary Disclosure. Remedial actions will be initiated consistent with ECMC approval of the Plan in a supplemental Form 27.

OPERATOR COMMENT

This project is part of Operator's ongoing data integrity review process associated with its Rule 525.e. Voluntary Disclosure. Operator has completed a comprehensive review of previously submitted forms and associated data and attachments of this project. Based on this review, Operator is submitting the attached Plan. The Plan includes an overview of the project's prior remediation measures, including initial actions and next steps. The previously issued Conditions of Approval (COAs) are addressed in the Plan.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
