General Comment:

This is a reclamation inspection of the APC RICHARDSON #2-15 location. A hearing application (docket#250900186) was submitted for this location requesting a variance of certain reclamation Rules. This inspection is to assess current conditions of the location. See attached photos and additional details within this report.

Reclamation - Storm Water - Pit

Interim Reclamation:

Date Interim Reclamation Started: _____ Date Interim Reclamation Completed: _____

ECMC Comments

| Comment | User | Date |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|------------|
| There appears to be a discrepancy regarding information of the variance application and site conditions. The variance cites that the access road and location should not be returned to pre-construction contours. This appears to be incorrect as the access road and location have already been recontoured. | CostaR | 05/14/2026 |
