Closure Information

This final reclamation completion notice is intended to close the GEMINI B-65N64W/31NENW (326821) location which consists of the GEMINI B #31-3 (API # 05-123-13720) wellhead. This wellhead does not share a disturbance with any other wells or tank batteries. There is one off location flowline associated with this well that transported crude oil to the associated tank battery, and was abandoned in March of 2019. The associated tank battery has its own location ID (302546) which will remain open until final reclamation has been achieved.

GEMINI B #31-3 was reclaimed and returned to the landowner for agricultural use in 2019. The wellhead was accessed from an unpaved access road that originated at an existing agricultural service road off of County Road 49. The access road was reclaimed and returned to agriculture in conjunction with the reclamation of the well location.

No Remediation Workplans (Form 27-I), Spills/Releases (Form 19), nor Corrective Actions (CA's) were identified during the records review.

Drone imagery confirms that no equipment was left on site at this location after reclamation activities occurred.
