General Comment:

On 05/20/2026, NW Reclamation Specialist Emily Gaasche conducted a reclamation inspection at Wesco Operating Inc's MAUDLIN GULCH UNIT-64N95W/35NWNE (Maudlin Gulch Unit #25) location in Moffat County, Colorado.

The location is within CPW High Priority Habitat: Elk Migration Corridor, Elk Production Area.

The following compliance issues were observed during this inspection:
-Stormwater (cut slopes bare)

Refer to the Reclamation and Stormwater sections of this report for additional details.

Refer to the photo-documentation attached to this report for additional details.

Any outstanding CA's from previous inspections remain applicable.

Comment:

Two wellhead markers are present. The margins of the pad are composed of Great Basin wildrye and big sagebrush with tertiary amounts of hoary cress and houndstongue, both noxious weed species. No weed control is required at this time. Ongoing weed monitoring and management is necessary until the location receives a passing final reclamation inspection.

The packet provided by Wesco states that the location will be reseeded and sprayed for weeds; Colowyo wants to keep the access road. Reseeding and weed monitoring alone is not sufficient to comply with 1004 reclamation rules.

Comment:

Cut slopes at the location are predominantly bare on the upper portion of the slopes; exposed roots, dead vegetation and escarpment indicate that the cut slopes are actively eroding/degrading. Stabilization measures and/or implementation of stormwater BMP's at the cut slopes are required.

Corrective Action:

Comply with Rule 1002.f.
